Bringing ABA into Your Inclusive Classroom:

A Workshop for Meeting the Needs of Students with Autism Spectrum Disorders

Participants will:

1. Understand the characteristics of students with ASD
2. Learn about the dimensions of Applied Behavior Analysis
3. Learn about different approaches to using ABA with students with ASD
4. Learn how to conduct assessments for developing ABA interventions for students with ASD
5. Learn how to set goals for ABA interventions for students with ASD
6. Learn how to develop ABA teaching procedures for students with ASD
7. Learn how to collect and analyze data to make instructional decisions
8. Learn how to collaborate with parents and professionals when implementing ABA interventions for students with ASD

Presenter: Dr. Debra Leach

Dr. Leach is a board certified behavior analyst who has been working with children with autism and their families for over 13 years. She received her doctoral degree from Florida Atlantic University in Exceptional Student Education with a specialization in autism and early intervention. She is currently an assistant professor of special education at Winthrop University and continues to consult with families and school districts to help others meet the unique needs of children with ASD and other disabilities.
